Dear Preceptor,

The Florida State University (FSU) College of Nursing would like to thank you for agreeing to serve as a preceptor in our graduate program. As a clinical expert, we value your expertise and greatly appreciate your commitment to our students. Your contribution is not only invaluable in helping our students reach their educational goals, you will contribute significantly to the profession as a whole.

The benefits of serving as a preceptor are many and are outlined in this handbook. One of the biggest rewards is assisting a novice nurse practitioner, nurse educator, or nurse leader to learn and grow under your mentorship. Additionally, you will find that the questions graduate students ask will stimulate your learning as well. We are also exploring other ways to reward you such as a courtesy appointment at FSU and access to the FSU library resources.

The materials found in this handbook will help you in your preceptor role. Specific clinical information will be provided by the student and is included in this handbook under “Clinical Guidelines”. Please review this information. A faculty member is assigned to each clinical course and this individual will be identified to you in a written letter at the beginning of each semester. For nurse practitioner students, the faculty member will schedule a time to evaluate the student in your clinical practice site. The student will arrange this date and time with you.

You are always welcome to chat with anyone in the College of Nursing regarding your role. For your convenience contact numbers are included in this handbook for the Dean, the Associate Dean, and the Assistant Dean for Graduate Programs.

Sincerely,

Judith McFetridge-Durdle

Judith McFetridge-Durdle, PhD, RN,
Dean and Professor
FSU College of Nursing

Preceptor Training

The purpose of the clinical preceptor program is to provide the students with a professional role model whose guidance will enhance the attainment of student learning. The preceptor will act as a facilitator and resource person to the student during the clinical learning experiences and will participate in the evaluation of the student’s learning. The preceptor will act as a facilitator and resource person to the student during the clinical learning experiences and will participate in the evaluation of the student’s learning.

Functions and responsibilities of the College of Nursing:
1. CON verifies that an FDLE/FBI Level II Background Screening has been completed for the student.
2. CON verifies that the student meets the clinical clearance requirements and able to start participating in the clinical experience.
3. Additionally, CON verifies that the student has completed the required drug screening, has personal health insurance, professional liability insurance coverage, and proof of current unencumbered Registered Nurse license in the state of Florida.

Functions and responsibilities of the preceptor:
1. Participate in a preceptor orientation if desired.
2. Function as a role model at the clinical site.
3. Orient the student to the agency/clinical site.
4. Assure safe nursing practice by supervising the student’s performance of clinical skills.
5. Assist the student in identification and monitoring of available activities, which accomplish the clinical objectives.
6. Communicate verbally and in writing with the student and collaborate with the faculty regarding student performance.
7. Provide feedback to the nursing program regarding clinical activities for students and suggestions for curriculum/program development as needed.
8. Keep the faculty informed of student performance when needed or if any problems occur.
9. Participate in evaluation of the preceptor program as needed.

Functions and responsibility of the student:
1. Participate in the selection of a clinical practicum and preceptor, when appropriate.
2. Supply preceptor will a copy of the course syllabus.
3. Maintain accountability for her/his learning activities.
4. Prepare for each clinical experience as needed and expected.
5. Be accountable for nursing practice activities while in the clinical setting. Arrange with your preceptor your clinical schedule for the semester.
6. Share learning experiences in grand rounds, clinical seminars, and student/preceptor/faculty conferences.
7. Keep open communication with preceptor and faculty.
8. Keep all patient and agency information obtained during clinical experiences confidential.
9. Complete all required course assignments.
10. Complete evaluation of preceptor(s).
11. Complete written self-evaluation as outlined in the clinical course.
12. Participate in the evaluation by the preceptor and or faculty of your clinical experience.

**Mission Statement of Florida State University**

The Florida State University preserves, expands, and disseminates knowledge in the sciences, technology, arts, humanities, and professions, while embracing a philosophy of learning strongly rooted in the traditions of the liberal arts. The university is dedicated to excellence in teaching, research, creative endeavors, and service. The university strives to instill the strength, skill, and character essential for lifelong learning, personal responsibility, and sustained achievement within a community that fosters free inquiry and embraces diversity.

**Vision**

The Florida State University will be one of the world’s premier institutions of higher education, devoted to transforming the lives of our students, shaping the future of our state and society, and offering programs of national and international distinction in a climate of inquiry, engagement, collegiality, diversity, and achievement.

**College of Nursing Mission Statement**

Florida State University, College of Nursing educates clinicians, leaders, scholars, and advanced practitioners who can enhance the quality of life for people of all cultures, economic levels, and geographic locations. The CON integrates the liberal arts and sciences with the knowledge, skills, and attitudes essential for lifelong learning, personal responsibility, and sustained achievement in the nursing profession and the communities in which our graduates reside.

**College of Nursing Statement of Beliefs**

Given the mission of the University and College, the faculty of the College is guided by a set of beliefs held by the faculty in relation to:

- nursing’s phenomenon of concern as human beings within the context of health;
- nursing as an evidence-based profession; and
- nursing education as a life long process.

The beliefs that guide the nursing education programs and the discipline of nursing at Florida State University are:

The foundation of nursing is based upon broad preparation in liberal studies, socialization into the core values of the profession, and preparation in the knowledge and skills requisite to practice at the baccalaureate and graduate levels.
Nursing knowledge is built on nursing practice, theory and research. In addition, nursing derives knowledge from other disciplines, adapting and applying this knowledge as appropriate to professional practice.

Nurses bring a unique blend of knowledge, judgment, skills and caring to the health care team. Professional nursing requires strong critical reasoning, clinical judgment, and communication and assessment skills and a commitment to life long learning. (AACN Baccalaureate Essentials, 2008)

Nurses must process the knowledge and skills needed to provide safe, culturally competent and high quality care in an environment of increasing diversity and globalization. (AACN Baccalaureate Essentials, 2008)

Nursing practice is comprised of approaches gained through scientific inquiry designed to broaden the evidence base of the profession. These approaches are designed to explain and facilitate the phenomenon of human existence in the context of health.

Baccalaureate education, the minimal requirement for entry into professional nursing practice, prepares the generalist and is the foundation for graduate nursing education. (AACN Baccalaureate Essentials, 2008)

The fundamental aspects of generalist nursing practice are: direct care of the sick in and across all environments, health promotion and prevention of illness, and population based health care. (AACN Baccalaureate Essentials, 2008)

Graduate nursing education prepares nurses for role enhancement and advanced professional practice.

Nursing must educate future professionals to deliver patient-centered care as members of an inter-professional team, emphasizing evidence-based practice, quality improvement approaches and informatics (IOM, 2003) (AACN Baccalaureate Essentials, 2008).
CERTIFICATE OF PROTECTION
for Nursing Students of the
Florida State University College of Nursing

Protected Group: Board of Governors of the State of Florida
Coverage Period: Non-expiring
Date Issued: January 15, 2013

The Board of Governors of the State of Florida, pursuant to the authority of § 1064.24, Florida Statutes, and BOG Regulation 10.001, has created and administers the Florida State University College of Medicine Self-Insurance Program (FSUCOMSIP). The FSUCOMSIP provides comprehensive general liability protection, including professional liability protection for the Florida State University Board of Trustees, acting as the Florida State University College of Nursing.

Coverage limit for the Florida State University Board of Trustees for the acts and omissions of College of Nursing students, set forth in the Florida State University College of Medicine Self-Insurance Program Memorandum of Protection and Conditions of Participation, Endorsement 3, are:

$100,000 for a claim or a judgment arising from an Occurrence for any one person;
$250,000 for all claims or judgments arising from an Occurrence; and
of these limits of professional liability protection required by a hospital or institution for all student practitioners not to exceed per an Occurrence limit of $1,000,000.*

This Certificate of Protection does not amend, alter or modify the protection afforded by FSUCOMSIP and is not fully descriptive of all conditions and restrictions. Please inquire directly with the undersigned for additional information, if required.

Margaret Reid

Orientation Information For Preceptors

College of Nursing has placed orientation information for preceptors on the nursing website (nursing.fsu.edu). The material available for preceptors include this Handbook and PDF of Preceptor PowerPoint slides. Once the preceptor has reviewed the material and taken the post test, which is acknowledging completion of an orientation material, she/he maybe awarded 2 Continuing Education Units (CEUs), if desired. Please contact the Assistant Dean for Graduate Programs as sporterfield@fsu.edu if you will a CEU certificate. A printed CEU certificate will be send to the preceptor upon request. Orientation includes review of Preceptor Handbook and review of PDF Preceptor Orientation or participation in Pod Cast of Preceptor Orientation and completion of posttest.

Definition of a Preceptor

A preceptor is an individual with expertise in a given area of interest that agrees to share knowledge and experience with someone in the student role. This learning experience may be accomplished by interaction, interview, and observation or by supervised or guided performance in a variety of educational and clinical settings.

DNP Family Nurse Practitioner Preceptor Information

The faculty at the Florida State University College of Nursing believes that instruction by practicing health care professionals contributes a significant dimension to the learning experience of students. Preceptors have a depth and breath of educational experience that supplements and complements the College of Nursing faculty. The preceptor stimulates the student to critically examine personal educational practice and to expand both personal and professional horizons, preparing for future employment in nursing education.

NGR 5003L: Preceptor Guidelines for the Nurse Practitioner Student (90 clinical hours)

NGR 5003L, Advanced Health Assessment for the Advanced Practice Nurse Lab, is the first clinical course of a series of six. This course is the student’s first clinical course which means they have not had pharmacology or other in-depth clinical courses. However the didactic portion consists of lecture material, discussion, written work, and demonstrations of the physical exam portion for each system. The clinical portion is an independent experience of at least 6 hours of clinical practice per week throughout the semester in order for the student to learn the history and physical assessment techniques of the various systems. The student is aware that it is his/her responsibility to prepare for clinical experiences. The student is expected to practice the assessments on patients that he/she comes in contact with during time spent with the preceptor.

This course focuses only on assessment, and upon completion, the student will be able to perform a complete health assessment including a medical history, and comprehensive physical exam. Students are encouraged to discuss differential diagnoses and treatment plans (both diagnostic and pharmacotherapeutics) with the preceptor but proficiency is not expected for this course.
Each student is expected to develop documentation skills. During the semester students submit SOAP notes on patient encounters to the faculty for grading. If your setting does not facilitate student entries in the clinical record, please encourage the student to document her/his cases on sheets separate from the records, using the SOAP method. The student can use these notes when presenting the patient to you.

The role of the preceptor is to guide and assist the student in mastering the necessary skills to complete a comprehensive H & P. Specifically, the student will need assistance in the use of the proper equipment and exam techniques. The student has been provided with a checklist of the necessary physical exam skills. The student should be able to verbalize understanding of the physical exam, i.e. names of lymph nodes, cranial nerves, DTRs, heart valve areas, etc. By the end of the semester, the student is expected to be proficient in performing the physical exam from memory.

You will be asked to complete an evaluation form on the student at the end of the semester. In addition, you will receive a visit from an FSU faculty member during the semester. During the site visit, the instructor will observe the student performing patient care. Your input is highly valued and you are encouraged to contact the faculty for this course, if the need arises. Your student will give you their faculty member’s name and contact information. You can also contact the Assistant Dean of Graduate Programs, Dr. Susan Porterfield, at sporterfield@fsu.edu, or office phone 850-644-5621 with any concerns or questions.

Specific expectations of the Preceptor:
- Work with the student for scheduling of required clinical hours
- Work with the student to facilitate learning
- Participate with the student and faculty in evaluating student performance
- Notify the appropriate supervising faculty and/or NP Program Director if problems arise during the clinical experience
- Support the student/preceptor relationship

NGR 5064L: Preceptor Guidelines for the Nurse Practitioner Student (45 clinical hours)

NGR 5064L, Advanced Skills for the APN course is designed to enable learners to develop skills for use in primary clinical practice. The learners explore both the theoretical and practical aspects of a variety of procedures and diagnostic modalities including suturing, EKG (basic and advanced), radiology, casting and splinting and dermatological procedures. The clinical portion is an independent experience of at least 6-8 hours of clinical practice per clinical day throughout the semester in order to hone advance skills. Prior to being with a preceptor the student will have participated in a 16 hours workshop on wound closure techniques (e.g. suturing), wound care, punch biopsy, radiology. The remaining clinical hours, 29, will be in the community with a preceptor. The student is aware that it is his/her personal responsibility to prepare for clinical experiences.

The role of the preceptor is to guide and assist the student in mastering the above-mentioned advance skills when the opportunity arises.
You will be asked to complete an evaluation form on the student at the end of the semester. Your input is highly valued and you are encouraged to contact the faculty for this course, if the need arises. Your student will give you their faculty member’s name and contact information. You can also contact the Assistant Dean for Graduate Programs, Dr. Susan Porterfield, at sporterfield@fsu.edu, or office phone 850-644-5621 with any concerns or questions.

**Specific expectations of the Preceptor:**
- Work with the student for scheduling of required clinical hours
- Work with the student to facilitate learning
- Participate with the student and faculty in evaluating student performance
- Notify the appropriate supervising faculty and/or NP Program Director if problems arise during the clinical experience
- Support the student/preceptor relationship

**NGR 6601L: Preceptor Guidelines for the Family Nurse Practitioner Student (180 clinical hours)**

This is the third clinical course in a series of six. The bulk of the students clinical experience thus far has been in advance health assessment and advance skills. However, they have had pharmacology, women’s health, and pediatric health didactic courses.

This course focuses on the care of patients with acute illness. The earlier clinical didactic courses have covered care of patients with advance skills, advance health assessment, pathophysiology, and pharmacology. The student is aware that it is a personal responsibility to prepare for anticipated clinical experiences that have not yet been covered in lecture. Each student should have an ample library of resources, but the preceptor should encourage outside literature review specific to cases seen in your setting. Additionally, it is hoped that you will call the student in on interesting cases that you are seeing in the clinic that would be unique learning experiences.

The required time commitment is **14-16 clinical hours per week.** The student should strive to see **8-10 patients per 8-hour clinical day**, by the end of the semester. The student should be able to perform, with supervision, **both complete and problem specific histories and physicals. The findings should then be presented to you in an organized and concise manner. The case presentation should be completed with a diagnostic statement and proposed management plan.** The faculty expects each student to develop “decision readiness” and accountability for the diagnostic management steps. This can only be perfected through practice and repetition. Each treatment plan should include diagnostics and pharmacotherapeutics, as indicated, as these are areas expected competencies.

**Each student is expected to develop documentation skills.** Students submit SOAP notes to the faculty for grading. It will be very helpful if you also will critique the documentation, whether written, dictated, or electronic. If your setting does not facilitate student entries in the clinical record, please encourage the student to document their cases on sheets separate from the records, using the SOAP method. In addition, students in our program each have a list of technical skills they are expected to develop prior to program completion. These include such hands-on tasks as
simple suturing, audiometry, electro- and chemical cautery, and splinting/casting. They also are expected to learn to do basic EKG and radiologic interpretations. Please encourage the student to perform these skills, whenever possible, in your clinical setting.

You will be asked to complete an evaluation form on the student the end of the semester. In addition, you will receive a visit from an FSU faculty member during the semester. During the site visit, the instructor will observe the student performing patient care. Your input is highly valued and you are encouraged to contact the faculty for this course, if the need arises. Your student will give you their faculty member’s name and contact information. You can also contact the Assistant Dean for Graduate Programs, Dr. Susan Porterfield, at sporterfield@fsu.edu, or office phone 850-644-5621 with any concerns or questions.

Specific expectations of the Preceptor:
- Work with the student for scheduling of required clinical hours
- Work with the student to facilitate learning
- Participate with the student and faculty in evaluating student performance
- Notify the appropriate supervising faculty and/or NP Program Director if problems arise during the clinical experience
- Support the student/preceptor relationship

NGR 6602L: Preceptor Guidelines for the Family Nurse Practitioner (180 clinical hours)

NGR 6602L, FNP Practicum II is the fourth clinical course in a series of six. The bulk of the students clinical experience thus far has been in advance health assessment, advance skills, and acute illness. However, they have had pathophysiology, pharmacology, women’s health, and pediatric health didactic courses.

This course focuses on the care of patients with chronic illness which utilizes previous class information and experiences. The student is aware that it is a personal responsibility to prepare for anticipated clinical experiences that have not yet been covered in lecture. Each student should have an ample library of resources, but the preceptor should encourage outside literature review specific to cases seen in your setting. Additionally, it is hoped that you will call the student in on interesting cases that you are seeing in the clinic that would be unique learning experiences.

The required time commitment is **14-16 clinical hours per week.** The student should strive to see **8-10 patients per 8-hour clinical day.** The student should be able to perform, with supervision, **both complete and problem specific histories and physicals.** The findings **should then be presented to you in an organized and concise manner.** The case presentation **should be completed with a diagnostic statement and proposed management plan.** The faculty expects each student to develop “decision readiness” and accountability for the diagnostic management steps. This can only be perfected through practice and repetition.

Each treatment plan should include diagnostics and pharmacotherapeutics, as indicated, as these are areas expected competencies.
Each student is expected to develop documentation skills. Students submit Subjective, Objective, Assessment, and Plan (SOAP) notes to the faculty for grading. It will be very helpful if you also will critique the documentation, whether written, dictated, or electronic. If your setting does not facilitate student entries in the clinical record, please encourage the student to document their cases on sheets separate from the records, using the SOAP method. In addition, students in our program each have a list of technical skills they are expected to develop prior to program completion. These include such hands-on tasks as simple suturing, audiometry, electro- and chemical cautery, and splinting/casting. They also are expected to learn to do basic EKG and radiologic interpretations. Please encourage the student to perform these skills, whenever possible, in your clinical setting.

You will be asked to complete an evaluation form on the student at the end of the semester. In addition, you will receive a visit from an FSU faculty member during the semester. During the site visit, the instructor will observe the student performing patient care. Your input is highly valued and you are encouraged to contact the faculty for this course, if the need arises. Your student will give you their faculty member’s name and contact information. You can also contact the Assistant Dean for Graduate Programs, Dr. Susan Porterfield, at sporterfield@fsu.edu, or office phone 850-644-5621 with any concerns or questions.

Specific expectations of the Preceptor:
- Work with the student for scheduling of required clinical hours
- Work with the student to facilitate learning
- Participate with the student and faculty in evaluating student performance
- Notify the appropriate supervising faculty and/or NP Program Director if problems arise during the clinical experience
- Support the student/preceptor relationship

NGR 6619L: Preceptor Guidelines for the Family Nurse Practitioner Student (225 clinical hours)

NGR 6619L, FNP Practicum III is the fifth clinical course in a series of six. The bulk of the students clinical experience thus far has been in advance health assessment, advance skills, acute and chronic illness. Additionally they have also completed pathophysiology, pharmacology, women’s health, and pediatric health didactic courses.

This course focuses on the care of patients with acute, chronic, and complex illnesses. The earlier clinical didactic courses have covered care of patients with acute and chronic illness as well as health assessment. The student is aware that it is a personal responsibility to prepare for anticipated clinical experiences that have not yet been covered in lecture. Each student should have an ample library of resources, but the preceptor should encourage outside literature review specific to cases seen in your setting. Additionally, it is hoped that you will call the student in on interesting cases that you are seeing in the clinic that would be unique learning experiences.

The required time commitment is 16-20 clinical hours per week. The student should strive to see 8-10 patients per 8-hour clinical day by the end of the semester. The student should be able to perform, with supervision, both complete and problem specific histories and
physicals, differential diagnosis, assessment, and plan. The findings should then be presented to you in an organized and concise manner. The case presentation should be completed with a diagnostic statement and proposed management plan. The faculty expects each student to develop “decision readiness” and accountability for the diagnostic management steps. This can only be perfected through practice and repetition. Each treatment plan should include diagnostics and pharmacotherapeutics, as indicated, as these are areas expected competencies.

Each student is expected to develop documentation skills. Students submit Subjective, Objective, Assessment, and Plan (SOAP) notes to the faculty for grading. It will be very helpful if you also will critique the documentation, whether written, dictated, or electronic. If your setting does not facilitate student entries in the clinical record, please encourage the student to document their cases on sheets separate from the records, using the SOAP method. In addition, students in our program each have a list of technical skills they are expected to develop prior to program completion. These include such hands-on tasks as simple suturing, audiometry, electro- and chemical cautery, and splinting/casting. They also are expected to learn to do basic EKG and radiologic interpretations. Please encourage the student to perform these skills, whenever possible, in your clinical setting.

Students are required to attend all scheduled clinical experiences with their preceptors. Students must give adequate notice to their preceptor if it is necessary to cancel any clinical experiences. Clinical preceptors provide an invaluable service to students, and any inconvenience to their practice must be minimized.

You will be asked to complete an evaluation form on the student at the end of the semester. In addition, you will receive a visit from an FSU faculty member during the semester. During the site visit, the instructor will observe the student performing patient care. Your input is highly valued and you are encouraged to contact the faculty for this course, if the need arises. Your student will give you their faculty member’s name and contact information. You can also contact the Assistant Dean for Graduate Programs, Dr. Susan Porterfield, at sporterfield@fsu.edu, or office phone 850-644-5621 with any concerns or questions

Specific expectations of the Preceptor:
- Work with the student for scheduling of required clinical hours
- Work with the student to facilitate learning
- Participate with the student and faculty in evaluating student performance
- Notify the appropriate supervising faculty and/or NP Program Director if problems arise during the clinical experience

**NGR 6942L: Preceptor Guidelines for the Residency Nurse Practitioner Student** (225 clinical hours)

NGR 6942L DNP Residency is the final clinical course for the DNP Family Nurse Practitioner Program. The student’s clinical experience has been varied and includes all aspects of being a Family Nurse Practitioner
This course provides an intensive clinical experience that is intended to demonstrate the culmination of the students’ advanced practice role. Each student will be required to submit individual objectives at the beginning of the semester to their faculty. Clinical experiences will be individually designed within the context of the focus of the students program. Your student will discuss in detail what they wish to experience during this clinical experience. Each student should have an ample library of resources, but the preceptor should encourage outside literature review specific to cases seen in your setting. Additionally, it is hoped that you will call the student in on interesting cases that you are seeing in the clinic that would be unique learning experiences.

The required time commitment is **16-20 clinical hours per week**. The student should strive to see **8-10 patients per 8-hour clinical day**. The student should strive to see a full complement of patients depending on the clinical site. The student should be able to perform, with supervision, both complete and problem specific histories and physicals. The findings should then be presented to you in an organized and concise manner. The case presentation should be completed with a diagnostic statement and proposed management plan. The faculty expects each student to develop “decision readiness” and accountability for the diagnostic management steps. This can only be perfected through practice and repetition. Each treatment plan should include diagnostics and pharmacotherapeutics, as indicated, as these are areas expected competencies.

**Each student is expected to develop documentation skills.** Students submit Subjective, Objective, Assessment, and Plan (SOAP) notes to the faculty for grading. It will be very helpful if you also will critique the documentation, whether written, dictated, or electronic. If your setting does not facilitate student entries in the clinical record, please encourage the student to document their cases on sheets separate from the records, using the SOAP method. In addition, students in our program each have a list of technical skills they are expected to develop prior to program completion. These include such hands-on tasks as simple suturing, audiometry, electro- and chemical cautery, and splinting/casting. They also are expected to learn to do basic EKG and radiologic interpretations. Please encourage the student to perform these skills, whenever possible, in your clinical setting.

In presenting a patient the student should present the patient in a concise manner. The case presentation should be completed with a diagnostic statement and proposed management plan. The faculty expects each student to develop “decision readiness” and accountability for the diagnostic management steps. This can only be perfected through practice and repetition. Each treatment plan should include diagnostics and pharmacotherapeutics, as indicated, as these are areas expected competencies.

You will be asked to complete an evaluation form on the student at mid-term and at the end of the semester. In addition, you will receive a visit from an FSU faculty member during the semester. During the site visit, the instructor will observe the student performing patient care. Your input is highly valued. Your student will give you their faculty members name and contact information. You can also contact the Assistant Dean for Graduate Programs, Dr. Susan Porterfield, at sporterfield@fsu.edu, or office phone 850-644-5621 with any concerns or questions.
Specific expectations of the Preceptor:

- Work with the student for scheduling of required clinical hours
- Work with the student to facilitate learning
- Participate with the student and faculty in evaluating student performance
- Notify the appropriate supervising faculty and/or NP Program Director if problems arise during the clinical experience
- Support the student/preceptor relationship

Post-Master Psychiatric Mental Health Nurse Practitioner Preceptor Information

NGR 5056C: Preceptor Guidelines for Psychiatric/Mental Health Nurse Practitioner Students (45 clinical hours)

NGR 5056, Advanced Psychiatric Assessment and Diagnostics is one of the first courses for this Psychiatric Mental Health certificate. The student is a certified Nurse Practitioner that is expanding his/her professional cope into psychiatric/mental health population. This course focuses on mental health assessment of clients across the life span within the context of the advanced psychiatric mental health nursing role.

The student should strive to see **6-8 patients per 8-hour clinical day**, by the end of the semester. The student should be able to perform, with supervision, both complete and problem specific histories and physicals. The findings should then be presented to you in an organized and concise manner. The case presentation should be completed with a diagnostic statement and proposed management plan. The faculty expects each student to develop “decision readiness” and accountability for the diagnostic management steps. This can only be perfected through practice and repetition. Each treatment plan should include diagnostics and pharmaco-therapeutics, as indicated, as these are areas expected competencies.

Each student is expected to maintain an electronic journal weekly with the following guidelines:
1. Narrative documentation of skill development in areas (i.e. mental status exams, psychiatric evaluation, therapeutic communication).
2. Narrative notes to describe learning activities encountered during that clinical session— for example, the note might include thoughts and feelings about a new patient seen or a diagnosis/symptoms, interface or interesting collaboration with the clinical staff, observation about a particularly challenging situation.

Specific expectations of the Preceptor:

- Work with the student for scheduling of required clinical hours
- Work with the student to facilitate learning
- Participate with the student and faculty in evaluating student performance
- Notify the appropriate supervising faculty and/or NP Program Director if problems arise during the clinical experience
- Support the student/preceptor relationship
You will be asked to complete an evaluation form on the student at the end of the semester. Your input is highly valued. You are encouraged to contact the instructor or Dr. Susan Porterfield, Assistant Dean for Graduate Programs at (850) 644-5621 to discuss any questions, concerns, or comments regarding the program, this course, the student, or your experience as a preceptor.

NGR 5503L: Preceptor Guidelines for Psychiatric-Mental Health Nurse Practitioner: Individual psychotherapy Lab (135 clinical hours)

NGR 5003L Psychiatric Mental Health NP Psychotherapy Individual course is the third course for this Psychiatric Mental Health certificate. The student is a certified Nurse Practitioner that is expanding his/her professional cope into psychiatric/mental health population. This course focuses on mental health an assessment, diagnosis, treatment, and evaluation of clients across the lifespan who are experiencing acute and/or chronic psychiatric disorders of clients across the life span within the context of the advanced psychiatric mental health nursing role.

The student should strive to see **6-8 patients per 8-hour clinical day**, by the end of the semester. The student should be able to perform, with supervision, **both complete and problem specific histories and physicals, assessing, diagnosing, and develop a treatment plan for the individual**. The findings should then be presented to you in an organized and concise manner. **The case presentation should be completed with a diagnostic statement and proposed management plan.** The faculty expects each student to develop “decision readiness” and accountability for the diagnostic management steps. This can only be perfected through practice and repetition. Each treatment plan should include diagnostics and pharmacotherapeutics, as indicated, as these are areas expected competencies.

Each student is expected to maintain an electronic journal weekly with the following guidelines:

1. Narrative documentation of skill development in areas (i.e. mental status exams, psychiatric evaluation, therapeutic communication).
2. Narrative notes to describe learning activities encountered during that clinical session—for example, the note might include thoughts and feelings about a new patient seen or a diagnosis/symptoms, interface or interesting collaboration with the clinical staff, observation about a particularly challenging situation.

Specific expectations of the Preceptor:

- Work with the student for scheduling of required clinical hours
- Work with the student to facilitate learning
- Participate with the student and faculty in evaluating student performance
- Notify the appropriate supervising faculty and/or NP Program Director if problems arise during the clinical experience
- Support the student/preceptor relationship

You will be asked to complete an evaluation form on the student at the end of the semester. Your input is highly valued. You are encouraged to contact the instructor or Dr. Susan Porterfield,
Assistant Dean for Graduate Programs at (850) 644-5621 to discuss any questions, concerns, or comments regarding the program, this course, the student, or your experience as a preceptor.

NGR 5508L: Preceptor Guidelines for Psychiatric-Mental Health Nurse Practitioner: Family and Group psychotherapy Lab (135 clinical hours)

NGR 5508L is the Psychiatric Mental Health NP Psychotherapy Group course. This is the lab for the fourth course for this Psychiatric Mental Health certificate. The student is a certified Nurse Practitioner that is expanding his/her professional scope into psychiatric/mental health population. This course focuses on mental health assessment, diagnosis, treatment, and evaluation of clients across the lifespan who are experiencing acute and/or chronic psychiatric disorders of clients across the life span within the context of the advanced psychiatric mental health nursing role.

The student should strive to see 6-8 patients per 8-hour clinical day, by the end of the semester. The student should be able to perform, with supervision, both complete and problem specific histories and physicals, assessing, diagnosing, and develop a treatment plan for the group. The findings should then be presented to you in an organized and concise manner. The case presentation should be completed with a diagnostic statement and proposed management plan. The faculty expects each student to develop “decision readiness” and accountability for the diagnostic management steps. This can only be perfected through practice and repetition. Each treatment plan should include diagnostics and pharmaco-therapeutics, as indicated, as these are areas expected competencies.

Each student is expected to maintain an electronic journal weekly with the following guidelines:
1. Narrative documentation of skill development in areas (i.e. mental status exams, psychiatric evaluation, therapeutic communication).
2. Narrative notes to describe learning activities encountered during that clinical session - for example, the note might include thoughts and feelings about a new patient seen or a diagnosis/symptoms, interface or interesting collaboration with the clinical staff, observation about a particularly challenging situation.

Specific expectations of the Preceptor:
- Work with the student for scheduling of required clinical hours
- Work with the student to facilitate learning
- Participate with the student and faculty in evaluating student performance
- Notify the appropriate supervising faculty and/or NP Program Director if problems arise during the clinical experience
- Support the student/preceptor relationship

You will be asked to complete an evaluation form on the student at the end of the semester. Your input is highly valued. You are encouraged to contact the instructor or Dr. Susan Porterfield,
NGR 5504L: Preceptor Guidelines for Psychiatric-Mental Health Nurse Practitioner Practicum

NGR 5504L, Psychiatric Mental Health NP Practicum is the final course for this Psychiatric Mental Health certificate. The student is a certified Nurse Practitioner that is expanding his/her professional cope into psychiatric/mental health population. This course focuses on mental health an assessment, diagnosis, treatment, and evaluation of clients across the lifespan who are experiencing acute and/or chronic psychiatric disorders of clients across the life span within the context of the advanced psychiatric mental health nursing role.

The student should strive to see 6-8 patients per 8-hour clinical day, by the end of the semester. The student should be able to perform, with supervision, both complete and problem specific histories and physicals, assessing, diagnosing, and develop a treatment plan for the individual. The findings should then be presented to you in an organized and concise manner. The case presentation should be completed with a diagnostic statement and proposed management plan. The faculty expects each student to develop “decision readiness” and accountability for the diagnostic management steps. This can only be perfected through practice and repetition. Each treatment plan should include diagnostics and pharmacotherapeutics, as indicated, as these are areas expected competencies.

Each student is expected to maintain an electronic journal weekly with the following guidelines:
1. Narrative documentation of skill development in areas (i.e. mental status exams, psychiatric evaluation, therapeutic communication).
2. Narrative notes to describe learning activities encountered during that clinical session—for example, the note might include thoughts and feelings about a new patient seen or a diagnosis/symptoms, interface or interesting collaboration with the clinical staff, observation about a particularly challenging situation.

Specific expectations of the Preceptor:
• Work with the student for scheduling of required clinical hours
• Work with the student to facilitate learning
• Participate with the student and faculty in evaluating student performance
• Notify the appropriate supervising faculty and/or NP Program Director if problems arise during the clinical experience
• Support the student/preceptor relationship

You will be asked to complete an evaluation form on the student at the end of the semester. Your input is highly valued. You are encouraged to contact the instructor or Dr. Susan Porterfield, Assistant Dean for Graduate Programs at (850) 644-5621 to discuss any questions, concerns, or comments regarding the program, this course, the student, or your experience as a preceptor.
