

Policy U-5
FLORIDA STATE UNIVERSITY
COLLEGE OF NURSING

Page 1 of 1

TITLE: ATTIRE FOR CLINICAL LABORATORY EXPERIENCES

POLICY: Students are expected to be properly attired for clinical laboratory experiences and when representing the College of Nursing. Clinical agency policies must be followed in addition to CON guidelines for clinical rotations. Students with visible tattoos and body piercing ornaments are prohibited from certain clinical agencies. If a comparable clinical assignment cannot be made to meet the course objectives, the student will not be able to complete the nursing program in its entirety.

RATIONALE: It is a professional expectation of students that they take pride in their personal appearance as a professional representative of the Florida State University College of Nursing, baccalaureate education, and the nursing profession as a whole. Contractual agreements with affiliated clinical agencies specify that clinical agency policies must be followed in addition to CON guidelines for clinical rotations. Many clinical agencies will not permit students to use gloves, long sleeves, bandages, and non-permeable materials to cover visible tattoos and body piercing ornaments.

PROCEDURE: See Attachment #1 proper clinical attire. In the event of a student comes to clinical inappropriately dressed, a corrective action will be taken by the instructor. Repeated breaches of this policy by a student may result in removal from the clinical experience. Students who are unable to meet a clinical agency's policy on attire and appearance and who cannot be placed in a comparable clinical assignment will not be able to progress in the nursing program.
